Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: a proposed amendment to independent claims 1-2 was discussed. The amendment provide language requiring that the substrate stage is fixed and having a constant vertical position relative to the vacuum plate. Applicant's representative argued that the incorporation of such limitation in the claims will not be a new issue. The examiner pointed out that such limitation was not considered before and that an amendment incorporating such limitation will require further consideration and search, and therefore will be considered new issue.
